

IN THE SPECIFICATION:

On page 7, lines 9-11, please amend the 'Brief Description of the Figures' as follows:

--Figure 2 is an enlarged perspective view of the circled portion 2-2 of Figure 1;

Figure 2A is an enlarged perspective view showing a portion similar to that shown in Figure 2 but having depressions having a substantially cylindrical configuration;

Figure 3 is an enlarged perspective view of the circled portion 3-3 of Figure 1;
and-

Please amend the paragraph beginning on page 8, line 17 as follows:

--In addition, exterior surface 10 includes tonal portions 20. Each one of tonal portions 20 includes a planar area 22, and a plurality of spaced depressions 24 recessed from the plane of planar area 22. Each one of depressions 24 includes a base 25 and sides 27. As shown in Figure 2, depressions 24 appear as open box-like recesses, or pockets, having a substantially square configuration. However, depressions 24 may also have a cylindrical configuration, **as shown in Figure 2A**. The bases 25 of depressions 24 are preferably recessed from the plane of planar area 22 from between about 0.001 inches to about 0.003 inches. However, the depth of depressions 24 may vary beyond this range depending on the substrate used to form door D, and the wood species being simulated.

Preferably, depressions 24 are recessed from the plane of planar areas 22 by about the same depth throughout exterior surface 10. Planar areas 22 preferably lie on a plane that is coplanar with the plane of outer portions 18. Alternatively, planar areas 22 may be slightly recessed from the plane of outer portions 18.--
